DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 3, and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bach [USPAT 6,402,395] and in view of Durbin [USPAT 4,658,130].

Bach discloses an optical waveguide plug connector comprising a right angle interface body 2 [fig. 3], a female alignment body 3, and a male alignment body 4b.

Bach discloses every aspect of claimed invention except for the tapered channel with the tapered male alignment body.

Durbin disclose fiber optic swivel coupler comprising the tapered channel with the tapered male alignment body.

It would have been obvious to the ordinary skilled person in the art at the time the invention was made to modify Bach's device to include the tapered channel with the tapered male alignment body for the purpose of proper and secure coupling efficiency.

In re claim 3, the Bach and Durbin inherently show the claimed methods.

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose or suggest an optical connector comprising all the specific elements with the specific combination including an anchor body adapted to securely engage an exterior surface of the female self-alignment body and adapted to anchor to a surface of the electro-optic board as set forth in claim.

Claim 5 is allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not disclose or suggest an electro-optical back plane comprising all the specific elements with the specific combination as set forth in claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Further references of interest are cited on Form PLO-892, which is attachment to this office action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ellen Kim whose telephone number is (703) 308-4946. The examiner can normally be reached on Monday and Thursday.
